Overview

Definition: The table used in Rate Based Cost of Attendance allows a user to define particular criteria whereby a student will then receive a different COA value than the one assigned with the COA group. We are able to use many different data items as qualifying criteria and specify the value the student should receive if he qualifies.

A user must define the header information, identifying the Award Year and which Item Code (To Do Item) the rules defined in the bottom of the form will apply. None of the qualification fields in the bottom of the window are required. Specifying the order in the first field indicates how each rate should be applied to the student. It is advisable to skip number in the first field in case it is necessary to add new detail at a later time.

Cuota de Laboratorios
